See the difference.

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease. Individual results may vary. This product is intended to be used in conjunction with a healthy diet and regular exercise.

Contains approximately 150 mg of caffeine per serving. Do not exceed one serving per day. Not recommended for use by individuals who are sensitive to caffeine, pregnant or nursing women, or those with medical conditions without consulting a healthcare provider.

THE 90-DAY JOURNEY

SMALL DAILY CHOICES. POWERFUL RESULTS OVER TIME.

MONTH 1:

FEEL THE SHIFT
DAYS 1-30

WHAT MANY USERS REPORT:

- + From the first cup: alert, focused energy that feels steadier than regular coffee.
- + By the end of the first week: the Day 1 effect is now familiar – the morning focus window has become a routine.
- + By week two: stress may feel less reactive; sleep may feel more restorative.
- + By week four: between-meal snack urges start quieting on their own.

WHAT'S ALSO HAPPENING:

Thermogenic and metabolic ingredients are working in the background from Day 1. The visible effects come later.

BY DAY 30:

A new morning rhythm is forming. Many users describe it as “just how mornings work now.”

MONTH 2:

THE NEW NORMAL
DAYS 31-60

WHAT MANY USERS REPORT:

- + Early in the month: snacking has become genuinely quieter – not something being fought, just less pulled.
- + Around week six: the morning ritual has become automatic; less thought goes into it.
- + Through this window: the calm-focus window may continue to support steadier days; the morning routine continues to support more restorative sleep.
- + By the end of the month: many users describe feeling more consistent day to day – fewer peaks and valleys in energy, mood, and appetite.

WHAT'S ALSO HAPPENING:

Thermogenic and metabolic support is building cumulatively. The effects that build quietly through Month 1 are compounding toward Month 2.

BY DAY 60:

The behavioral pattern has shifted. The product is less something you take and more something that's part of how the day runs.

MONTH 3:

SUSTAINED CHANGE
DAYS 61-90

WHAT MANY USERS REPORT:

- + Early in the month: the relationship with food feels different – less trigger-and-react, more choice.
- + Through this window: steadier day-to-day energy; cravings that used to feel automatic are now occasional.
- + Around week twelve: many users notice their clothes fitting differently – often before the scale reflects it.
- + By Day 90: the morning ritual is fully integrated; the product has become invisible – less something you take, more just how mornings work.

WHAT'S ALSO HAPPENING:

The less-visible ingredients have had time to do their work. The effects that build quietly through Months 1 and 2 are at their most established by Day 90.

BY DAY 90:

CoreJava has become part of the lifestyle. Less something you take. More simply how mornings work.

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease. Individual results may vary. This product is intended to be used in conjunction with a healthy diet and regular exercise.

A top-down view of a light-colored, textured surface, possibly a stone or concrete countertop. In the upper left, several whole, dark brown coffee beans are scattered. In the upper right, a white ceramic spoon is filled with a mound of light brown, irregularly shaped coffee granules. Some granules have spilled onto the surface around the spoon. In the lower right, more whole coffee beans are scattered, along with some fine coffee powder. A white ceramic bowl is partially visible at the bottom right edge. The overall aesthetic is clean and modern, emphasizing the natural ingredients of the product.

CoreJava

WEIGHT CONTROL COFFEE

POWERED BY CLINICALLY STUDIED INGREDIENTS

CHROMEMATE®

Supports healthy blood sugar levels[†]

SUPER CITRIMAX®

Supports healthy weight management[†]

L-THEANINE

Promotes calm, focus, and relaxation[†]

NATURAL CAFFEINE

Boosts energy, focus, alertness, and metabolism[†]

PARADOXINE®

Supports thermogenesis[†]

SAFFR'ACTIV®

May help reduce occasional snacking[†]

THE HONEST PART:

Results depend on what surrounds the routine. CoreJava supports the underlying biology – the habits around it (hydration, protein, activity, sleep) determine how much of that support shows up in visible change.
